

## PRESS STATEMENT

### **MALAYSIA GENERATES OVER RM1.5 BILLION IN SUSTAINABLE INNOVATION TRADE AND INVESTMENT POTENTIAL AT EXPO 2025 OSAKA**

---

**OSAKA, JAPAN, 17 September 2025** – During week 22 at Expo 2025 Osaka that runs from 8-14 September 2025, Malaysia generated over RM1.5 billion in trade and investment potential, co-led by the Ministry of Energy Transition and Water Transformation (PETRA) and the Ministry of Natural Resources and Environmental Sustainability (NRES), with Malaysian Green Technology and Climate Change Corporation (MGTC) as the implementing agency.

The amount was generated through 68 business meetings between Malaysian participating companies with organisations and business entities from various nations in the energy, water, and green technology sectors.

This included RM38.74 million generated through the signing of Memorandum of Co-operation, Memoranda of Understanding and Memorandum of Agreement. Notably, this figure is expected to grow further, as several companies have yet to disclose their potential collaboration at this juncture.

Malaysia's participation in Week 22 underscored its commitment to environmental stewardship, biodiversity conservation, clean and renewable energy generation and utilisation, and water resource management.

It further strengthened the Malaysia MADANI aspiration, showcasing Malaysia's progress in sustainable development through exhibits at the Thematic Corner, along with a series of pocket talks delivered by company representatives and ministry officials.

Throughout the week, the Malaysia Pavilion highlighted the nation's bold vision for a low-carbon and climate-resilient future, showcasing leadership in energy transition, water transformation, and green technology. It featured high-level business forums, technology showcases, business matching, and knowledge-sharing sessions that reinforced Malaysia's role as a global partner in driving sustainability and innovation.

Malaysia's participation at Expo 2025 Osaka strengthened ties with international stakeholders, industry leaders, and civil society, establishing the Pavilion as a centre for dialogue, investment, and collaboration. It showcased Malaysia's active role in shaping a sustainable global future.

The programme concluded with a closing ceremony and an environmental film screening titled 'Footprints in the Forest', to call for the protection of our forests, wildlife, and ecosystems- serving as a timely reminder and take-away action item to wrap up the week's engagements.

**- END -**

#### **About the Malaysia Pavilion at Expo 2025 Osaka**

*The Malaysia Pavilion at Expo 2025 Osaka spans 2,654.52 square meters across three floors, reflecting the nation's diverse culture and dynamic economy. The pavilion draws inspiration from Malaysia's weaving tradition and iconic songket, symbolising heritage interwoven with innovation. With the theme "Weaving a Future in Harmony", the Pavilion highlights Malaysia's commitment to a sustainable, inclusive and forward-looking future.*

*Over 26 weeks, the Pavilion serves as a hub for international collaboration and dialogue. Business weeks will feature participation from 21 ministries, 70 agencies and 10 state governments, with a variety programmes including exhibitions, product launches, MoU signings and business matching sessions. The Pavilion will also host forums, summits and networking events that position Malaysia as a dynamic global partner.
